SWAPNIL GAIKWAD

Mumbai, Maharashtra | Software Quality Assurance| 8097327196| gaikwadswapnil476@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Quality Assurance Engineer with **3 years 8 months of experience** in manual, API, mobile, and automation testing across web and mobile applications. Experienced in REST API testing using Postman, backend validation using SQL/MySQL, and automation using Playwright, Selenium, and basic Appium. Hands-on experience developing REST APIs using Node.js and Express.js. Strong knowledge of Agile methodologies, defect lifecycle management, and delivering high-quality software releases.

KEY SKILLS

- **Testing:** Functional, Regression, Smoke, Sanity, UAT, API, Mobile, Cross-Browser, Cross-Device
- **Tools:** Postman, JIRA, SQL, MySQL, AWS CloudWatch, Lighthouse, GitHub
- **Automation:** Playwright, Selenium, Appium (Basic)
- **Backend :** Node.js, Express.js, REST APIs
- **Tools :** Postman, JIRA, Git, GitHub, AWS CloudWatch, Lighthouse, GTM
- **Database :** SQL, MySQL
- **Platforms:** Web, Android & iOS
- **Methodologies :** Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Tester | Cordelia Cruises
January 2025 – present

- Execute manual testing across Web, Android, and iOS applications to ensure high-quality software releases.
- Validate REST APIs using Postman and verify backend data integrity using SQL queries.
- Develop and maintain Playwright automation scripts and execute basic Appium automation for regression and smoke testing.
- Developed backend APIs using Node.js and Express.js for application features.
- Design and maintain the QA automation project structure with reusable utilities, helper modules, and configuration files.
- Create and maintain daily QA checklists to standardize regression testing and release validation.
- Perform cross-device, cross-browser, and multi-OS compatibility testing.
- Report, track, and manage defects using JIRA with detailed reproduction steps and impact analysis.
- Participate in Agile ceremonies, including sprint planning, daily stand-ups, and defect triage meetings.

QA Tester | Tring India
November 2022 – December 2024

- Conducted functional, regression, end-to-end, UAT, API, and mobile application testing.
- Tested Android and iOS applications for installation, permissions, deep links, push notifications, and user experience.
- Performed REST API testing using Postman and validated backend data using SQL.
- Developed basic Selenium automation scripts for repetitive regression scenarios.
- Monitored QA and staging environments using AWS CloudWatch to identify application and service-level issues.
- Performed performance audits using Google Lighthouse.
- Validated Google Tag Manager (GTM) events and analytics tracking across customer journeys.
- Created and maintained test cases, test documentation, and regression suites.
- Managed the complete defect lifecycle using JIRA while collaborating closely with developers and product teams.

KEY PROJECTS

QA Automation Framework

- Designed and organized a scalable Playwright automation framework with reusable modules and helper utilities.
- Developed automation scripts for smoke and regression testing, improving framework maintainability and reducing repetitive manual effort.
- Standardized automation project structure and testing workflows for easier maintenance.

Backend REST API Development

- Developed RESTful APIs using Node.js and Express.js.
- Implemented request validation and API endpoints while collaborating with the QA and development teams.
- Tested APIs using Postman and validated backend data using SQL.

EDUCATION

Bachelor of Science in Information Technology
N.G. Acharya D.K. Marathe College, Mumbai
Graduated with 66.80%
Relevant Coursework: Software Testing, Quality Assurance, SDLC
